This is the fifth store in Gifu Prefecture and the 118th KeePer LABO store.</p> <p>Since the store was built on a vacant lot, all of the five coating booths and four washing and finishing areas were designed so that car washing, KeePer coating, and interior cleaning can be completed at this location, reducing the amount of labor required by staff to move vehicles and allowing them to perform high-quality work safely. The design also allows for safe, quality work.</p> <p>In addition to the guest room, which overlooks all operations, there is also a patio area inside the coating booth where customers can sit and talk to us while looking at their cars.</p>
